Security Cameras
Video Intercom (Residential & Commercial)

Watch and monitor your home and your business on your cellphone tablet, computer, or laptop in HD Resolution from anywhere in the world. You have a babysitter at home and you want to monitor his/her activities for your child from work on your cellphone, NO PROBLEM, We have got you covered!

Protect your home and car by installing High Definition Composite Video Interface Close-Circuit television (HDCVI CCTV) also known as video surveillance.

Collect as much as evidence in case of a weird situation to exposure for law enforcement for further action. This evidence will not be available if you are not shielded by saved images from your surrounding video surveillance cameras at your home or your car.

Survey says 98% of offender will stop approach places which are covered by security camera.

Act before it gets too late.

You will be amazed by seeing the quality of images on your cellphone, tablet, computer or laptop.

What it makes us different from other companies is 4 things:

- 1 Competitive price, we really meant it!!
 - 2 Design and implement the whole project by computer engineer from American's well-known university
 - 3 We are designing and implementing CCTV projects for over 15 years, Residential and Commercial
 - 4 Free support and maintaining the project either in person or remotely after installation for 2 years
- Surveillance Camera(CCTV), Residential and Commercial
Visual Doorbell with Camera and monitor
Surveillance Camera for your car

Note: There are thousands of intersections and streets in our area that it is not covered by surveillance camera. By installing Dash Cam (Recording Camera) in your car you will have enough evidence to prove your innocence in weird situation (especially for insurance purposes).

We are really proud of our cleaned, engineered, responsiveness, punctuality, professionalism jobs we are doing!
